

Stamp. Scan. Profile.

The easiest, simplest and most affordable scan capture solution available today.

1 Place personalized stamps (different for each user) on the first page of documents to be scanned.

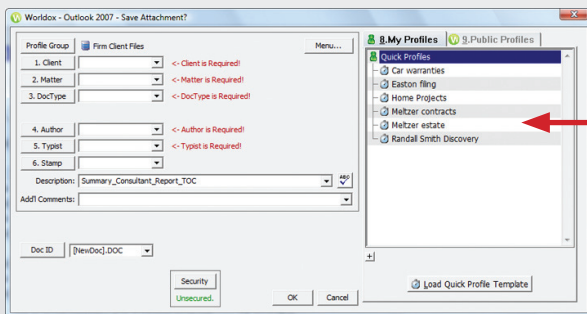

2 At any scan device, load document(s) and press the Airmail2 button.

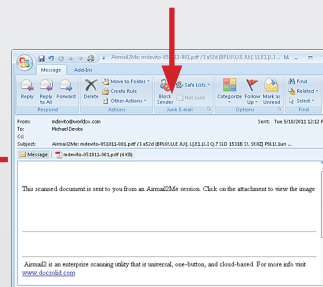

There has long been a huge gap between the desktop scanner set-ups used by smaller firms, and the complex, expensive scanning systems favored by large firms.

Now the new Worldox Airmail2 solution fills that gap.

It's on-demand, personalized scanning - cloud-based, integrating automatically with Outlook and Worldox for fast profiling of scanned files. You get the power and DMS-linked scanning features big firms expect, at a price small and medium firms can live with.

4 You open the attachment (or link from the monitored folder) and save the file into Worldox.

3 Scanned files arrive as email attachments - or are saved to Worldox monitored folders.

Powered by DocSolid's Airmail2

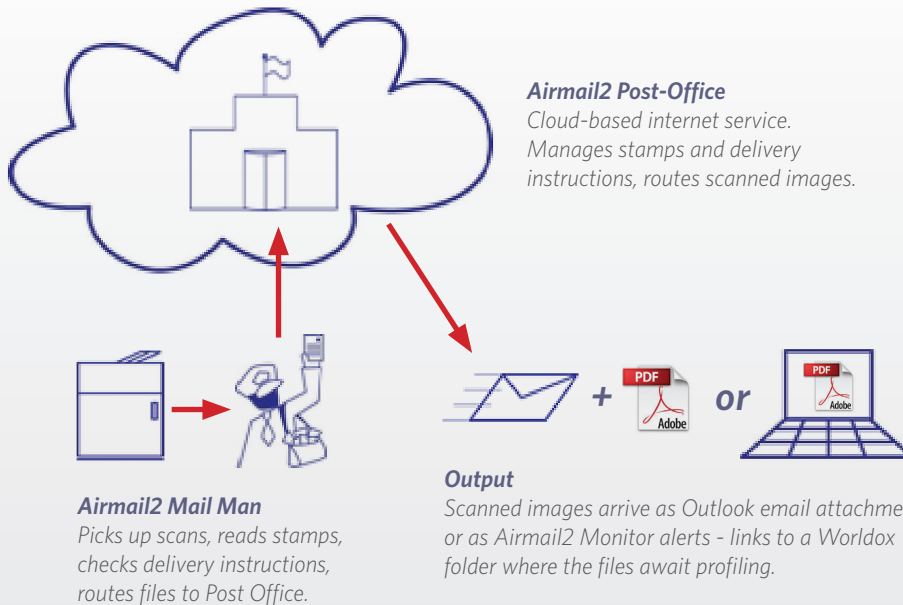

- One low site license price, covers any number of users.
- Modest per device maintenance charge.
- Total cost per site is typically 20 to 25% what competing systems charge for similar scanning services.

Call Today!

We recommend Airmail2 as a scanning solution for Worldox users. Please call, so we can tell you more about it:

(800) 962-6360

Use any scanning device, anywhere. One-touch operation. No extra hardware or software needed.

Why you need Airmail2

- Cloud-based - for the ultimate in low-cost, low-investment operation.
- Uses any make/model of MFP, digital copier or scanner.
- One-button operation at any scanning device - no logins or keypad typing.
- OCRs and converts to searchable PDF.
- No hardware or software additions are needed for MFPs or other scanning devices.
- Delivers scanned files via email, or writes to Worldox-monitored network folders.
- Secures, logs and audits scanning activity.

Users love Airmail2 because it simplifies scanning, makes it so easy to save scanned images into Worldox.

Administrators love it for simple set-up and low maintenance.

CFOs love it because it delivers the power and flexibility of much more expensive systems - at a truly affordable, subscription price.
