

Airmail2 provides an enterprise scan capture platform for law firms. It enables simple, standardized workflows at scanning devices firm-wide. *Airmail2* works with any make-model of digital copier, multifunction printer (MFP) or scanner, with the touch of one button. It can work with cost recovery systems. And *Airmail2* can scan directly into Worldox-managed folders for even easier profiling.

Easy set-up, personalized stamps and delivery instructions.

Each *Airmail2* user receives a roll of unique, bar-coded stamps. Set-up is done using a simple web app, where you activate that stamp code and decide how to receive scanned images - by email or via monitored folder alerts on your desktop. It's your call ... delivery instructions can be changed at any time.

Security

- 256 bit VeriSign SSL encryption of all interaction with the cloud based *Airmail2* Post Office, protecting browser sessions and scanned file transfer.
- The *Airmail2* Post Office is hosted at a SAS-70 Type II certified, world class facility and the market leader in secure hosted services.
- *Airmail2* Post Office storage for scanned file distribution is temporary, and interim scan storage is protected by encryption.
- *Airmail2* delivers secured links to scanned files to avoid email security exposures.

Activation

- *Airmail2* is turned on from the cloud, then the *Airmail2* Mail Man is downloaded to a selected network server.
- Set-up an *Airmail2* soft button at each scanning device to be used.
- No software or hardware to install for scanners; no network or email system integration needed; no desktop software to install.
- Distribute stamps to *Airmail2* users (a different unique stamp for each user).

Worldox Airmail2 pricing*

- **\$1,995 one-time charge per site** - covers any number of users.
- **\$495 yearly site maintenance**
- **\$395 yearly maintenance per MFP or scanning device** (minimum of 3)

*Does not include installation/training support
